

Advantec MFS, Inc. is a wholly owned subsidiary of Toyo Roshi Kaisha, Ltd. (Japan), a major producer of filtration media and related scientific products since 1916. This US-based operation was originally founded in 1979 as Toyo Roshi International, Inc., a California corporation. Two of the three original divisions (Main Office and Micro Filtration Systems) were merged in 1995 to become Advantec MFS, Inc.

We aim to serve the pharmaceutical, public health, food and beverage, health care, life sciences and electronics industries with high quality products for separation science. Our product range includes membrane filters, prefiltration media, glass fiber and cellulose filters, qualitative and quantitative filter papers, specialty test papers, and an extensive range of filter holders in stainless steel, plastic, and glass for laboratory and process applications.

Customers have the right to expect the highest quality products we can produce. We manufacture our filter products to exacting standards and have established quality control specifications to assure you of product consistency, reproducibility, uniform performance and

superior product integrity. The bulk of our membrane filters, test papers, and filtration units are manufactured under a quality management system certified by Lloyd's Register QA Ltd. as ISO 9001 approved. This certification is recognized by the United Kingdom Accreditation Service (UKAS) and by the Japan Accreditation Board for Conformity Assessment (JAB).

Our Customer Service Department prides itself on its excellent service and prompt accurate deliveries. Orders will ship the same day they are placed for stock on hand. In the case of back ordered supplies, we can give you an accurate lead time and suggest alternatives that may meet your needs. Should you have any questions about any of our products, our Technical Service department will provide you with current, application-specific information. We value our customers large and small and we strive to support them in every way possible.

Our goal continues to be what we have done for over 90 years: to manufacture consistent, reproducible quality products at the lowest possible cost and to provide the best possible service in their delivery.
